

IRevolution: A Data-Driven Exploration Of Apple's iPhone Impact In India Using Tableau — Requirement Analysis

Project Overview

The project aims to analyze the growth, market impact, and consumer adoption of Apple's iPhone in India using data visualization and analytics through Tableau. It focuses on transforming raw market and sales data into interactive dashboards to understand trends, patterns, and business insights.

Problem Statement

Apple's iPhone has shown significant growth in the Indian smartphone market, but its adoption varies by region, income group, pricing segment, and time period. There is a need for a data-driven analysis to understand market penetration, sales performance, and consumer behavior using visualization tools.

Project Objectives

- Analyze iPhone sales trends in India over time
- Compare iPhone market share with competitors
- Study regional and demographic adoption patterns
- Evaluate pricing vs demand relationship
- Create interactive Tableau dashboards for decision insights
- Identify growth opportunities for Apple in India

Scope of the Project

- Historical sales and market data analysis
- Regional and yearly trend visualization
- Dashboard creation in Tableau
- Comparative brand analysis
- Consumer segment insights

Stakeholders

- Academic project evaluators
- Business analysts
- Marketing researchers
- Technology market observers
- Students learning Tableau & data analytics

Data Requirements

- Year / Quarter

- Region / State / City
- Brand & Model
- Units sold
- Revenue
- Price category
- Market share percentage
- Customer segment

Functional Requirements

- Import datasets from Excel/CSV/Database
- Clean and transform data
- Create calculated fields and measures
- Build trend charts, pie charts, maps, and comparison graphs
- Provide filters for year, region, model, and price
- Enable interactive dashboards
- Export reports and snapshots

Non-Functional Requirements

- Fast dashboard loading
- Clear and readable visuals
- Accurate and validated data
- User-friendly interface
- Visualization best practices
- Compatibility with Tableau Desktop/Public

Tools & Technologies

- Tableau Desktop / Tableau Public
- Excel / CSV datasets
- Tableau Prep / Excel for cleaning
- Built-in Tableau analytics

Key Performance Indicators (KPIs)

- Year-wise iPhone sales growth
- Market share percentage
- Revenue contribution
- Regional adoption rate
- Average selling price vs volume
- Competitor comparison index

Expected Deliverables

- Cleaned dataset
- Tableau workbook file
- Interactive dashboards
- Insight report
- Charts and storyboards

- Final presentation
