A Data-Driven Exploration of Apple's iPhone Impact in India Using Tableau

Focus: Customer Journey Analysis

1. Introduction

Apple Inc. has transformed the global smartphone industry with the iPhone.

In India, the iPhone has evolved from a premium niche product to a growing aspirational and lifestyle-driven device.

This project explores:

- iPhone sales growth in India
- Customer demographics
- Purchase behavior
- Customer journey stages
- Brand loyalty & retention

2. Objectives of the Study

- Analyze iPhone sales trends in India
- Understand target customer segments
- Map the customer journey stages

- Identify key purchase drivers
- Measure customer satisfaction & retention
- Evaluate India's strategic importance

3. Customer Journey Framework

Awareness → Consideration → Purchase → Experience → Loyalty

4. Key KPIs for Tableau Dashboard

- Year-wise sales growth
- Revenue contribution from India
- Age group distribution
- Region-wise sales
- Market share comparison
- Customer retention rate
- Customer satisfaction ratings

5. Suggested Tableau Dashboards

- Sales Overview Dashboard
- Customer Demographics Dashboard
- Customer Journey Funnel
- Loyalty & Ecosystem Impact Dashboard

6. Conclusion

The success of Apple in India is driven by effective customer journey management,

strong brand positioning, financing accessibility, retail expansion, and premium customer experience.
