

Revolution: A Data-Driven Exploration of Apple iPhone's Impact in India (Using Tableau)

Project Planning Phase

1. Project Overview

- This project analyzes the growth and impact of Apple Inc.'s iPhone in India using Tableau.
- It focuses on sales growth, market share, pricing strategy, manufacturing expansion, and economic contribution.

2. Project Scope

- Included: Sales trends analysis, market share comparison, economic impact, Tableau dashboards.
- Excluded: Global Apple analysis and hardware-level technical study.

3. Project Objectives

- Identify yearly sales growth patterns.
- Evaluate Apple's competitive position in India.
- Study impact of Make in India manufacturing expansion.
- Develop interactive dashboards.

4. Resource Planning

- Human Resources: Data Analyst, Tableau Developer, Research Assistant.
- Tools: Tableau Desktop/Public, MS Excel.
- Data Sources: Apple Reports, IDC, Counterpoint, Ministry Reports.

6. Risk Management

- Incomplete data – Use multiple verified sources.
- Data inconsistency – Proper cleaning and validation.
- Time delay – Weekly monitoring.
- Software issues – Backup and regular saving.

7. Budget Planning

- Tableau License (if required).
- Internet and research costs.
- Printing and documentation costs.

8. Success Criteria

- Accurate dataset.
- Clear dashboards.
- Meaningful insights.
- Positive evaluation.

9. Expected Deliverables

- Clean dataset (Excel/CSV).
- Tableau dashboard file.
- Final project report.
- Presentation slides.

5. Project Timeline (5 Weeks)

Phase	Activity	Duration
Phase 1	Data Collection	1 Week
Phase 2	Data Cleaning & Preparation	1 Week
Phase 3	Data Analysis	1 Week
Phase 4	Dashboard Development	1 Week
Phase 5	Report Preparation	1 Week
