

IRevolution: A Data-Driven Exploration Of Apple's iPhone Impact In India Using Tableau

Technology Stack

- Data Visualization Tool: Tableau – Used for creating dashboards, story points, forecasting, filters, and interactive visual analytics.
- Data Source & Storage: Microsoft Excel / CSV – Used for storing raw datasets, cleaning data, and preprocessing.
- Data Processing (Optional): Python (Pandas, NumPy, Matplotlib) – Used for data transformation and handling missing values.
- Database (Optional): MySQL – Used for structured storage and querying large datasets.
- Operating System: Windows 10/11 or macOS.
- Hardware Requirements: Minimum 8GB RAM, Intel i5 or above processor, 256GB storage.

Technology Stack Summary

Component	Technology Used
Visualization	Tableau
Data Source	Microsoft Excel / CSV
Data Processing	Python (Optional)
Database	MySQL (Optional)
Platform	Windows / macOS
