

IRevolution: A Data-Driven Exploration Of Apple's iPhone Impact In India Using Tableau — Project Design Phase

Design Phase Overview

The design phase defines how the project will be structured, how data will be processed, and how Tableau dashboards will be created to analyze Apple's iPhone impact in India. It converts project requirements into a practical visual analytics framework.

Design Goals

- Transform raw smartphone market data into structured datasets
- Build interactive Tableau dashboards
- Enable multi-level analysis (time, region, price, competitors)
- Provide clear decision-support visualizations
- Ensure user-friendly dashboard navigation

System Architecture Design

- Data Layer: Excel/CSV market datasets
- Processing Layer: Data cleaning and calculated metrics
- Visualization Layer: Tableau dashboards and storyboards

Data Model Design

- Sales Table: Year, Quarter, Model, Units Sold, Revenue
- Region Table: Region, State, Zone, Category
- Product Table: Model, Launch Year, Price Segment
- Competitor Table: Brand, Market Share, Price Range
- Defined relationships between tables using model and region keys

Dashboard Design Structure

- Market Overview Dashboard
- Regional Impact Dashboard
- Product and Price Analysis Dashboard
- Trend and Growth Dashboard

Visualization Design Choices

- Sales Trend — Line Chart
- Market Share — Pie/Donut Chart
- Regional Sales — Map
- Model Comparison — Bar Chart

- Price vs Units — Scatter Plot
- Growth Rate — Area Chart

User Interaction Design

- Global filters for Year, Region, Model, Price
- Drill-down navigation
- Hover tooltips
- Click-to-filter actions
- Dashboard navigation buttons

Calculated Fields Design

- Sales Growth Percentage
- Revenue Growth Percentage
- Average Selling Price
- Market Share Ratio
- Region Contribution Percentage

Performance Design

- Use aggregated datasets
- Limit heavy joins
- Optimize Tableau extracts
- Reduce unnecessary calculated fields
- Prefer extract mode for large data

Storyboard Design

- Introduction
- Market growth overview
- Regional penetration
- Product performance
- Price-demand relationship
- Competitive comparison
- Key insights and conclusion

Expected Design Outputs

- Clean data model
- Tableau data source
- Interactive dashboards
- Tableau story flow
- KPI calculation logic
- Visualization layout plan
